# WEATHER OF CONCERN

## Weather of Concern

Northern California: Red Flag Warning for areas of northeastern California, in effect Monday afternoon. Wind gusts of 35 to 40 mph are possible with humidity levels in the low teens to single digits.

## **Weather Advisories, Watches, and Warnings currently active in California:**

- <http://www.wrh.noaa.gov/hazardSummary/?state=ca>

## **Active Weather Warnings, Watches and Advisories by County:**

- <http://www.wrh.noaa.gov/hazardSummary/?state=ca&bycounty=1>

# **WEATHER SYNOPSIS BY REGION**

## **NORTHERN CALIFORNIA**

\*\*\* High Risk for Low Relative Humidity and SW Gusts 35-40 mph Far Eastside this Evening \*\*\*

\*\*\* Gusty SW-NW Winds Thursday, Followed by More N Winds Fri-Sun \*\*\*

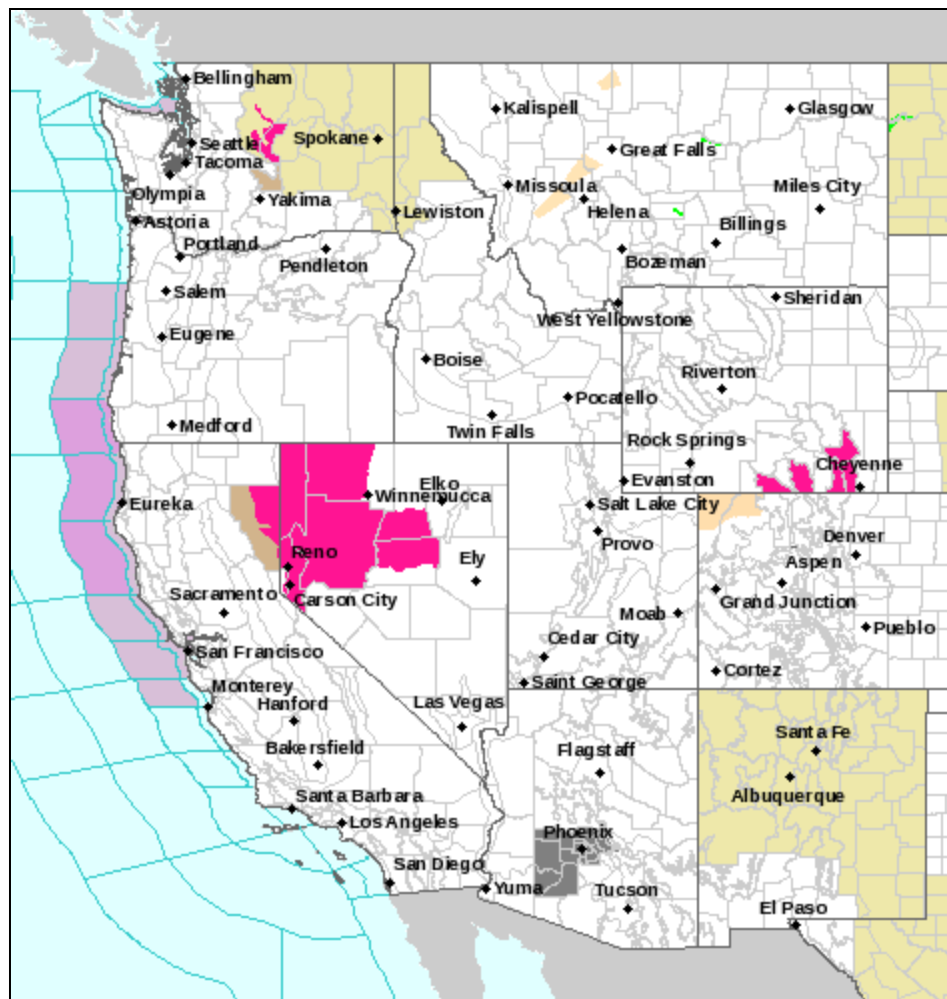

A low pressure trough will be over the West Coast through Wednesday. Temperatures will be 5-10 degrees above normal there with minimum Relative Humidity 8-18%. To the west of the crest temperatures will be closer to normal and Relative Humidity will be higher than this past weekend, with light winds in all areas except where the sea breeze reaches. The marine layer is 2500-3000 ft deep and moved well inland last night.

The trough will be overhead through Wednesday. On Tuesday it will weaken, allowing temperatures to climb a bit and the Eastside winds to be lighter. On Wednesday the trough will deepen slightly and drop temperatures and increase the Eastside winds slightly. Disturbance moving through the trough on Thursday will bring a brief period of gusty SW-NW winds, with a slight chance of showers or thunderstorms in far northern and northeastern areas. The disturbance will move off to the east overnight and a northerly wind pattern will develop Fri-Sun.

## **SOUTHERN CALIFORNIA**

A weak ridge of high pressure centered over the Desert Southwest will bring near to a little above normal temperatures away from the coastal areas on 06/25/18, with mid 70s to mid 80s across the mountains and upper 80s and 90s in the valleys. This ridge will strengthen Tuesday and Wednesday causing temperatures to warm a few degrees, with upper 70s and 80s across the mountains and 90s to 102 in the valleys. Evening westerly winds through the desert passes will be 15 to 25 mph with gusts to 40 mph through Tuesday. A Pacific trough will move into the West Coast causing temperatures to cool to near or a little below normal Thursday and Friday. This trough will also bring westerly winds of 20 to 30 mph with gusts to 50 mph across the mountain ridges and desert passes Wednesday evening through Thursday night. The marine layer will deepen and morning low clouds and fog will make it over the lower coastal mountain slopes Thursday and Friday. A ridge of high pressure will build into California from the Pacific Ocean bringing significant warming to the region and a shallower marine layer to the coastal areas this weekend. North winds of 15 to 25 mph with gusts to 40 mph will surface across much of Santa Barbara County and the Grapevine Friday evening into Saturday morning. Minimum humidity will be in the single digits and teens above and inland from the marine layer through this weekend.
